Projects

• E-commerce

PHP | MySQL
It is designed with a clean interface and optimized for performance, providing a smooth shopping experience without relying on any external CMS or framework.

GitHub: github.com/esteham/e-commerce_xet-shop
Live Site: https://eshop.xetroot.com

• Aviation Ticket System

PHP | MySQL
Aviation is a custom dynamic website developed using core PHP. The site is designed to showcase aviation-related content with a focus on performance, clean UI, and responsive layout.

GitHub: github.com/esteham/aviation-system_xeteviation
Live Site: https://aviation.xetroot.com

• Local Service Provider Network

React | PHP | MySQL |
Hyper Local Service Provider Network with Dynamic Worker finder and Pricing web application.

GitHub: github.com/esteham/local-service-provider
Live Site: https://kamla.xetroot.com

• Land Services

React | Laravel | MySQL
A modern, citizen-friendly portal for managing land services e.g. apply for Khatian/Mouza Maps, submit mutation requests, pay fees and land tax, and track everything online.

GitHub: github.com/esteham/easy-land
Live Site: https://eland.xetroot.com

• Hospital Management (HMS)

Vue InertiaJS | Laravel | MySQL
Xet Specialized Hospital is an online healthcare portal designed to deliver comprehensive medical services from the comfort of your home.

GitHub: github.com/esteham/hospital-management
Live Site: https://hospital.xetroot.com
